### Summary

Keep track of your filament types and colors with tags

[3D Printers](#) > [Accessories](#)

Tags: [tag](#) [filament](#) [label](#) [name](#) [nametag](#)

Keep track of the filaments you have (or ever had) with tags!

Great to see how it prints and looks. For instance, one color of red is not the same as the next.

The tag holds 3 lines of text, I use Brand/Material/Color(name), but modify to your needs. of course it can also be used on a suitcase, keys, everything else that needs a name tag

There are only design files added, since the tag needs to be modified for every kind of filament The tag was designed with Fusion360, but I also added .skp and .ipt files.

to modify in Fusion360:

Open the file and modify the sketch (there's only one sketch)

double click any letter to enter new/other text.

finish sketch and export to prusaslicer.

## Model files

**fillament-sample-tag\_skp.skp**

**fillament-sample-tag\_ipt.ipt**

**fillament-sample-tag\_f3d.f3d**
