I couldn't find any GoPro quick release mount for Camrock TH70 so I designed this using upper part from GoPro Tripod mount by tmorris9 (<https://www.thingiverse.com/thing:81333>)

The base at the bottom is 39.6 mm exactly.

Tips:

- print with PETG (or something stronger),
- enable supports everywhere,
- clean the hole with 5mm drillbit,
- glue the M5 nut with CA glue.

Happy printing and videomaking!

Check my other videos at youtube.com/medyk3d and tell me if it was worth buying GoPro 9.
