The .stl file is included so you could slice the staples in any quantity and size.

My recommendation is to print the staple in black and then paint it as needed.

Could be included in Prosthetics, Costumes and manny more things.

The staple_short.stl is exactly the same as the staple.stl but with shorter legs, so it also could be integrated into facial Prosthetics.

When printing smaller than 2 cm I recommend you use the print bed supports options in the Prusa slicer.
