Summary

3D Star that has American Flag overlayed.

[Art & Design](#) > [Wall-mounted](#)

3D Star that has American Flag overlayed.

There are two versions, whole and pieces that can be glued together to make a larger version.

The whole star can be printed on an MK3S in one shot.

The pieces files are the star broken into individual pieces that can be glued together. The final star is about 20 inches from point to point. Requires 5 separate prints.

I printed in white PLA on a smooth sheet and then painted the red and blue sections.
