## Summary

Designed to sit next to a bank of printers, this houses three Menda® pump bottles for print bed cleaning solutions.

Over the years I have continued to optimize the maintenance and cleaning supplies that I need next to my printers and this little tray is what I have been using for the last year now. It houses three of the 6oz **Menda® One-Touch pump bottles** for my various print bed cleaning solutions. The two side wings hold paper towels I usually reuse until they are worn out. The two side slots hold my **plastic safety-razor scraper** and my filament cutters. And everything else gets tossed in the tray.

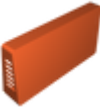

## Build Tips

- No supports are needed
- I printed everything at .3MM layer height
