Summary

Simple index card holder for around 80 index cards

Tags: [office](#) [holder](#) [card](#) [cards](#) [index](#)

This was done in inches, so if you have to scale it up, do so by 2540% (1in = 25.4mm).

I measured 80 index cards at 17.1mm, gave it 20mm and 2mm walls.
YMMV since different cards have different thicknesses.

I use this for keeping notes about filament settings, but you can use it for whatever you need!
