Loosely inspired by Adam Savages Youtube video about making a belt holster from aluminium, I created this holster for my Leatherman Charge TTi.

Belt size: up to 40mm wide and 3mm thick, but feel free to contact me if you would like a specific size.

Print orientation should be correct (standing on the small bottom side).

I printed it in Extrudr Greentec Pro Carbon with 0.2mm layers, 3 perimeters and 50% infill. I think normal PLA should do just fine.
