After receiving my Analogue Pocket, I was disheartened to discover that it wasn't compatible with one of the finer gaming accessories of all time- The Hori Light Boy VLB-01.

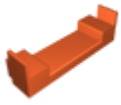

I thought this would be an excellent opportunity to create a product to fill this void.

Printed in my default settings on a MK3S+ - 0.20 mm quality

Should print as is, no supports or modifications required on the plate.

Insert the adapter onto the Lightboy to have the device mate onto the surface, then slide the Pocket in at a straight 90 degree angle. I have the screen protector on, and it's a snug fit but doesn't appear to be overly tight.
