Build your own heartshaped pictureframe. This cool Kit prints in an hour and can be assembled without glue. Just snap the parts together following this quick guide:

For easier orientation of the foot, there is a little extra-heart that must be facing toward the desk:

Do you want to gift this kit to your valentine? Just put the print in a standard valentines-card as a present. It should fit most sizes.

To cut the photo you can easily use the backplate as a template to cut with a cutter:

Print:

- Printed in red PLA
- 0,2mm layer-height
- 0,4mm nozzle
- Print-Time: 1:00 hr
- for spareparts, download the "only-parts"-version and select the needed part in PrusaSlicer
