We use a whiteboard to schedule our week. These tags allow us to put weekly tasks on the days without writing and re-writing them.

They use two 6x3mm magnets glued on the back to hold them to the board. Acceptable sizes of magnets are between 10x1mm and 5x3mm. I found that snap fit was too much for these small prints, and you will likely crack them.

These don't need supports and can be easily printed in PLA, PETG, or ABS.

I would suggest that for families with multiple kids, that you can choose a different top color for each child. Then you can use labels such as "GAME" for multiple kids.

There are likely dozens, if not hundreds of other tags you could print, so hopefully this sparks your creativity!
