Tool holder for all the tools that come with Prusa I3 plus a hole for a usb stick. I recommend flipping it 180 degrees onto its top to print it. Needs very little infill.

Sorry it's not the greatest, but it works for me. It's a good solid tool holder.

Print instructions Category: 3D Printer Accessories Print Settings

Printer Brand: Prusa

Printer: I3 MK3S

Rafts: No

Supports: No

Resolution: .3

Infill: As little as you think you can get away with. Doesn't need much.

Filament: hatchbox PETG orange

Notes:

I flipped it onto its top for printing. This leaves the bottoms of the holes a little rough from bridging but works fine.
