Summary

Bumper for the SRAM carbon cranks

[Sports & Outdoor](#) > [Outdoor Sports](#)

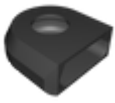

Tags: [sram](#) [bumper](#) [crank](#)

These bumpers are fitting the current and older SRAM cranks. They are styled not like the original SRAM bumpers, I used the design of my [e.13 crank bumpers](#) because these are a bit thicker.

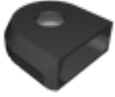

My current version is printed in TPU, you may try out other types of material.

Here are two versions, one fitting for the current and one for the older cranks, I tested older (2018) SRAM X0 Eagle. They are similar but the bigger hole for the crank is on the other side.
