### Summary

For mounting 3rd 2.5in drive in a node 202

[Gadgets](#) > [Computers](#)

An older project that I wanted to upload.

I wanted to mount a 3rd 2.5in drive in my node 202.  
Mounts in the GPU / radiator area with M3 screws and washers.  
Compatible with short GPUs or single fan radiators  
Recommended for use with SSDs over HDDs

Required Parts:

- 2 - M3x12 Screws
- 4 - M3x6 Screws (Depends on the drive)
- 2 - M3 Washers
- SATA Power Extension
- ~60cm SATA Cable

This part has been in service in my personal pc since 2018 through multiple moves and running around with the pc in a Costco backpack. (Might upload pictures later and double-check hardware requirements)
