The yoni was photographed in a temple at bantaykdei near Angkor Thom in Cambodia.

Yoni and Lingam are a holy symbol of the creation, often placed under an opening so the rain can drip on the lingam, flow down into the yoni and then can be captured at the opening at the yoni.

However, in this case the lingam did not stay up in its place after centuries.

75,78mm x 101,18mm. Base 0,3mm, layerheight 0,1mm.

Category: 2D Art
