This piece was created as a replacement to a component of a cellphone holder that a friend of mine couldn't find in the local market. There are a few variations of this holder around the market so I went for one similar to the one I already had in possession. I know I didn't do any break through but it ended up being pretty useful.

I hope it also works for you just in case you need it !  
And if not just give a ring ;)
