I am using E3D's Revo Micro on the Prusa MINI for a while now and am very impressed so far. I also like the original mount E3D designed for Revo but it lacked some color so I decided to make this multi-color version. I already printed it in Prusament PC Blend CF and PETG Prusa Orange and Signal White and it looks pretty cool in my opinion.

Please let me know what you think. You can find the STL's and a gcode file I made in PrusaSlicer. If you decide to use my gcode you can load black in slot one, orange in slot two, and white in slot three. Obviously, you are free to use any color you want but this is how i sliced the model.

All credits for the original design of the Revo Micro Upgrade are for E3D.

Check the print instructions and upgrade guide here: <https://e3d-online.zendesk.com/hc/en-us/articles/4415484403473>

Happy printing!
