Summary

4mm hole guide for 45mm square stock.

A jig to drill 4mm holes into a 45mm square stock. I used it for some balusters but should work for other stuff as well. You can scale it up or down, as needed, just bear in mind the hole size will also change (though it can be enlarged by drilling it out).

I used it a few years ago and lost the part so I only upload a screenshot, not a printed part.
