Hi, with the situation with the COVID19 Coronavirus, this came to mind so that we can operate the faucet without the use of our hands and wash them safely, same as in the hospitals.

It would be also useful for people with physical limitations.

It's fits the regular faucet from "Belanger" here in Québec/Canada, it as a 7 teeth 10mm shaft.

Now printing the one for the hot side they are the same.

I have included my Fusion 360 files if you want to make modifications.

Be safe.
