Well, one piece if you ignore the 75 airsoft pellets and the optional spice ring. With this ultra-low profile turntable, the bearing balls roll directly on any hard, flat surface. Turn any plate or bowl into a lazy susan. Or add the optional spice ring and organize your spice cabinet. It uses 6mm airsoft pellets as bearing balls that snap securely into the ball track. I've included a 150mm turntable (shown) and a smaller 100mm turntable as well.

And by popular demand, for those of us with, um, less than pristine counter tops, I've included an optional base that will keep the balls from getting gunked up.

## Print Settings

### Printer:

UDIO

### Rafts:

No

**Supports:**

No

**Resolution:**

0.2mm

**Infill:**

15%

**Notes:**

If you like you can print with **zero** top layers to expose the infill pattern as I have done for an interesting visual effect.

Post-Printing =====

The 150mm turntable requires 75 airsoft pellets and the 100mm turntable requires 47 pellets. Just snap them into the track, and you are ready to spin.

To use it as a spice organizer (or other things that may want to fly off), snap on the matching size "spice" ring.
