ABOUT

Since there is no good and precise vector of this classic logo on internet, I recreated this one by hand in Fusion 360.

Logo is 3mm high including 1mm foundation.

There are 3 types of foundations so you can choose what suits your needs. I also included standalone letters if you ever need them.

PRINTING

Print first millimeter with background color (I used black), then add filament change (M600) command and change to main color you want letters to be in.

I printed this using 0.2mm layer height, 2 perimeters, 25% infill, Hilbert's curve as top layer so my gold filament sparkles in the sun

Print time is approximately 30 minutes.

SUPPORT

If you need another type of foundation, contact me and I can modify model to fit your needs.
