Tags: [holder](#) [screw](#) [gluegun](#) [workbench](#)

Before you is a side-saddle screw in workbench holder for a glue gun. It's not perfect; the opening could be a bit more molded to the specific gun. But it appears to work okay for my two glue guns and has a hook for your cord (should your glue-gun posses one).

As always be careful with hot glue guns. Any hot component will melt through the plastic easily should a heated area contact the plastic. Make sure this doesn't happen!
