Summary

This is the first working design of my Ryobi P305 Hot Glue Gun specific holster. It may work on similar models as well.

This is the first working design of my Ryobi P305 Hot Glue Gun specific holster. It may work on similar models as well.

The design might get a further revision to tailor it down a bit to the flared housing of the gun itself if I have time.

It's designed to fit almost a bit too snugly on this specific glue gun.

As always, don't leave a hot glue gun unattended or let hot bits contact plastics. They melt!

Print instructions Category: Tool Holders & Boxes Print Settings

Printer: Monoprice Maker Select Mini

Rafts: Doesn't Matter

Supports: No

Resolution: .2

Infill: 25%

Notes:

Prints well if lined up on the bed. The design is made to be self supporting. Depending on how well your print layer cooling handles overhang you may see a bit of sag with some materials..
