Summary

Here a desk case for a 5 inch touchscreen with a special On/Off feature

[3D Printers](#) > [Accessories](#)

[repetier](#) [5inch](#)

I was looking for touchscreen with an On/Off Button and I ended up with designing my opwn desk case for it

1. Print all parts.
2. Use a soldering iron to press the inserts into the frontpanel.
3. put he screen into the case
4. Place the small button on the front panel upper corner.
5. Screw it ;-)

Here the amazon links for the material I used:

[5" Touchscreen](#)

[Screw set](#)

threaded insert

Also to get rid of the cables her some adapter to make it mor "angled".

HDMI 90degree

Micro USB 90degree

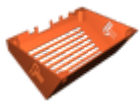

I also added a work in progress magnetic backplate to just snaped it on the printer.

Enjoy it
