License plate holder for the KTM Duke 790. This design uses the stock tail light and aftermarket 10mm turn signals. Most 3rd party tidy tails use a non standard tail light and many of them are bad. I decided to design my own tidy tail that uses the stock 790 tail light. Clam shell fit with internal routing of wires.

Mine is printed in carbon fiber reinforced polycarbonate. Has held up to weather and riding for 2 years. Print with supports.
