Summon the Terror of the Bone Dragon!

Hauntingly elegant and cloaked in spectral silver and icy white, the Bone Dragon glides into your collection like a forgotten guardian of ancient catacombs. With its skeletal frame, chilling bone textures, and glinting ghost-fire eyes, this dragon looks like it rose from the ruins of a long-lost kingdom.

Perfect for fans of gothic fantasy, undead legends, or creatures that whisper power in silence, the Bone Dragon is both a mesmerizing display piece and an addictive fidget toy.

This print-ready STL comes in two versions—with and without a keychain hole—so you can let it haunt your shelf or take this spectral

companion with you wherever you go. Its fully articulated body moves smoothly, like the rustling of bones in the wind.

We recommend printing at 0.2 mm layer height for the most defined skeletal details, though it still chills beautifully at 0.4 mm—just like in our photos. Print it in white, silver, pearl, or even glow-in-the-dark filament for that extra ghostly glow.

Download now and raise the Bone Dragon from its slumber... but beware—legends say it guards the gates of forgotten realms.

P.S. The Bone Dragon loves moonlight, silence, and long flights through frozen skies. Don't be surprised if it disappears into thin air when you're not looking...

This Dragon is part of our Articulated Dragon Collection: [View Collection](#)
