I created a Crossfire T antenna holder for my Shendrone Terraplane.

The top version is made for placing it over the antenna holder. I also made the bottom version, if you want to place it below the antenna (e.g. for flying without the guards).

I used a knife to make a small slice into the top version, so I could fit the antenna into it without disconnecting it from the crossfire rx.

Printed in TPU with 100% infill.
