

## SD Card Holder - Clip version

[VIEW IN BROWSER](#)

updated 29. 12. 2022 | published 29. 12. 2022

### Summary

Just a quick and dirty remix in TinkerCAD so it uses the same clip as nozzle holders and need no supports.

[3D Printers](#) > [Accessories](#)

Tags: [holder](#) [sd](#) [extrusion](#) [cardholder](#) [3030extrusion](#)  
[sdcard](#) [sdcardholder](#)

I really like this [Nozzle Holders - Individual \(0.25 + 0.4 + 0.8mm\)](#) so I've adapted the same mechanism to this cardholder.

I also made the bottom thicker, because it was super thin and not printed without the "detect thin walls" setting.

Print without support laying on the side.
