Summary

This is a universal game controller holder that should support many modern game controllers.

This game controller holder was originally intended to hold a DUALSHOCK 4 controller with the official back button attachment, as I couldn't find any online that would do that. After designing it and testing it, I noticed that it also worked with my other controllers! I've tried it with:

- DualShock 4 with and without the back button atachment

- DualSense
- Xbox Series X controller
- DualShock 3
- Steam Controller.

To use it, simply... place your controller on it! If it doesn't work in one orientation, just rotate it 180 degrees.

UPDATE:

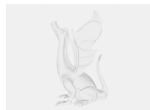

It's also compatible with:

- MSI Force GC30 V2
