I got me some of these new compact & foldable Godox softboxes AD-S60S, AD-S65W, AD-S85S, etc. for my Godox AD300Pro's. They work just fine but I wanted to use the magnetic color gels from my AK-R1 kit with them. So I decided to design my own gel holder compatible with the AD300 Pro. I made a couple of prototypes until I came up with this idea. I printed it from black PETG because it needs to be a little bit flexible! You will also need 4x small wood screws (d2.2 x 4.5mm DIN7981). Don't use stainless steel, they need to be magnetic. Some self adhesive foam rubber and aluminium foil tape for the interior of the gel holder

PS. I also uploaded the STEP files in case you have to modify something. More infos on my blog here:
