This is a super easy and light mount for the Fatshark TVL600 FPV-Cam. I designed it with an 15 degree angle for my FPV-Racing Quad (<http://fpv-community.de/showthread.php?46099-CNC-Fr%E4sservice-f%FCr-mini-h-quad-gesucht-Carbon>).

For mounting to the frame screws with a diameter of 3mm are required. The length depends on your frame.

For the top holder i used 20mm M3 GFK screws and matching nut.

The hole spacing for mounting is 35.4 mm and if you need other sizes or angles, please just contact me.
