This is a super lightweight and foldable receiver mount for the Graupner GR-16 including two mounting holes for the antenna-tubes (e.g. those

[http://www.ebay.de/itm/like/171635211111?ul\\_noapp=true&chn=ps&lpid=106](http://www.ebay.de/itm/like/171635211111?ul_noapp=true&chn=ps&lpid=106)).

For mounting to the frame you need some double-sided tape and zip ties.

I've designed the mount for my ImmersionRC Vortex to be able to pack in my Transport box.

A friend and I fly it several weeks and so far there showed no weaknesses.

\*Update to v2, 07.04.2016 - Smoother style.

## Print instructions

Just print it with PLA and 100% infill.  
For assembling you need a M3 30mm screw and one locknut.
