Flexi Betta Fish

Say hello to this cute fish! Elegant, wiggly, and ready to swim off your printer!

Fun fact: Male bettas flare their fins like tiny underwater dragons when showing off or defending their space. Total drama queens.

This model was actually suggested by one of my amazing Patreon members, and I loved the idea so much I had to sculpt it right away! The model I uploaded is **60mm long**, but trust me, this fish looks great in any size. I had way too much fun printing a whole school of bettas in different scales

If you'd like to **sell prints** of this or my other 3D models, check out my **Patreon** and get the **commercial license!**

patreon.com/Symbiance

Tip for extra cuteness:

Try **drybrushing** the fins with a little acrylic paint! Just dip your brush in paint, wipe most of it off on a paper towel, and lightly brush over the raised fin details. It adds subtle highlights and really brings the waves to life. Something you just can't get with filament alone!
Don't forget to tag me if you post your fishies!

multicolor & singlecolor version included!

Model is about 60mm long. It can be sized to your liking!

Print in place & no supports needed!

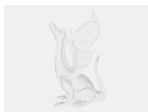

Have fun printing!
