Hello !

I created simple but reliable stand test for **Raspberry Pi 3B+**. It's designed that way for better air circulation. I use that by myself and it's very helpful - few degrees less.

**Feel free to comment and if You like it please click "Like" button.**

Fits very well to:

- **Raspberry Pi 3B** all available versions

If You like my model You can buy me a coffee ---> <https://paypal.me/DamianS0k0l> or click Donate button 0:-)
