updated 12. 2. 2022 | published 12. 2. 2022

Summary

Inspired by the "IKEA Lack enclosure reinforcement supports" from Darazsweb

[3D Printers](#) > [Accessories](#)

Tags: [ikealackenclosure](#) [reinforcement](#)

This model has smaller dimensions (90mmx90mm) for my needs then original "IKEA Lack enclosure reinforcement supports" from Darazsweb. 4 pieces of 4.5x25mm countersunk head wood screw and 4 pices of 5x25mm pan head wood screw are used for fastening. Printed with 0,3mm layer height, 3 perimeters, 40% infill.

This remix is based on

IKEA Lack enclosure reinforcement supports

by Darazsweb
