## Summary

A simple clothes rail holder for IKEA Platsa wardrobes. It is similar to Hjalpa.

Tags: [ikea](#) [holder](#) [bracket](#) [rod](#) [rail](#) [platsa](#) [hjalpa](#)

I had a rail once that I intended to use with my IKEA Platsa wardrobe but it was not the exact IKEA type so I made an adapter for it that you can easily screw in the Platsa holes for installation.

I included the source f3d file so you can easily modify to your needs and rail diameters.

Print with 3 perimeters and 20% infill. Works for me for a year now without any problems.

I'll upload real life photos soon.

### Feedback is important!

I spend countless hours perfecting and testing my designs and I would love to hear your feedback too. If you like my designs I appreciate a like or a comment. Please post a photo if you print this.

## Donations

I am open to any kind of donation if you want to support me :)
