This is a body cap to fit the Contax-Yashica CY-Mount. It uses the standard locking pin in the camera to latch in place, so to release you must hold down the lens release button.

Knurled edge to help in attaching/detaching from the camera. My first prototypes had a smooth circumference, and that made it very difficult to grab onto.

Tested on Yashica FX-2 camera and also a CY to Sony E-mount adapter.

I recommend printing with support because of the bayonet flanges.
