A ring with horns.

Note that the inner diameter is 15mm. You might have to scale the model in order to fit your finger. If in doubt, it is better to print it a bit too big than to have it not fit at all. Also be aware that the printed ring can shrink a bit when cooling.

I strongly recommend printing with a brim. If the bed adhesion is good enough, it prints well without supports.

I printed using Prusament PLA Galaxy Black. It took 46 minutes with the 0.1mm detail preset on the MK3S+. You might want to tweak the settings a little in order to reduce stringing.
