Update 2023-04-30

Now updated to not require any screws everything just snaps together. Old version still available if you prefer it.

Original Description

Universal headphone holder for use with IKEA Skadis pegboard.

4 hooks for maximum hold 3 hook variant if you are mounting very low on the board and don't have the space.

Hooks are designed to be printed on the side so the layer lines are not the weak point.

These holders need to be assembled with two M3x8 screws that self tap into the plastic.

Notes

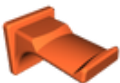

For best results print with supports on the build plate only and no supports for bridges.

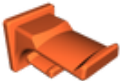

Made with the personal version of Autodesk Fusion 360 therefore non commercial only.

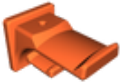

Source file included.
