Keebio Chocopad Rev. 2

Case V1 and Plate Files

For use without the original bottom PCB style plate. Top plate is optional, this is a more traditional style of keyboard case common for MX style boards.

Designed to pair with my [lily58 choc case](#)

Case V2

This case combines the top plate and wall surrounding the board while not covering the bottom. This allows for the bottom PCB style plate to stay attached and be visible when flipped over.
