Summary

This is a small testpiece to test for dice slot geometry.

I just started reworking the diceslots in my MegaTray project. It has this slanted top surface which is part of the style, so I needed to find a better slot to hold the dice, then regular round or hex cutouts.

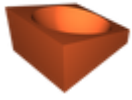

You can check the different styles I'm gone through in the second image. And here is a post of the [MegaTray](#). This was the master, it later got molded and cast in resin. And now I found the slots not working nicely.

With these egg shaped slots I'm pretty happy and I thought I share them here for others to test.

I'm also working on smaller items to make use of these slots. New uploads coming soon.

Disclaimer: The dice in the pictures are my own creation, if you're interested in that, check out my [Instagram](#) profile and contact me there. Same for print on demand. I don't have a shop and do commissions and print on demand as my time allows.
