Tags: [box](#) [headphone](#) [pen](#) [phone](#)

My wife wants to have a set of head phone holder, pencils box and phone box close to her on her desk when working from home.

I design a first part which may directly slipped into a groove in the office desk. The second part is either the head phone holder or the pencils box or the phone box.

At the beginning, I separated the designs because I would like to have an easy way when printing them. And after I thought it was easier to create plugin system and create the second part whatever it is (head phone holder, pencil box or phone box).

The plugin design permits to avoid glue to put them together.

I put the fusion3D file if you want to change the 1st part as it is very specific to the design of my desk.

All my prints are with Prusament Galaxy Black and print on Mini+.
