Riding a scooter this winter I often froze my hands. So I decided to design this handguard for scooters. I think it is compatible with all Xiaomi, I have tested it on mine which is a pro 2. In addition to protecting them from the cold, they can be very useful in case of a fall. I also integrated support to mount indicators because caution is never too much. There is also the rear support for the indicators

Remember to mirror the model with respect to the z-axis to print both right and left!
