Tags: [ikea](#) [skadis](#) [xbox](#)

### Update 2023-04-30

Now updated to not require any screws everything just snaps together. Old version still available if you prefer it.

### Original Description

Xbox One controller holder for use with IKEA Skadis pegboard **now updated to have better retention based on community feedback.**

**Another community inspired version with a front lip for when you need some extra secure hold can be found here: <https://www.printables.com/model/212510>**

Hooks are designed to be printed on the side so the layer lines are not the weak point.

## Now available in 3 hooks and 4 hooks variants for more flexible positioning on the pegboard grid.

These holders need to be assembled with two M3x8 screws that self tap into the plastic.

### Notes

For best results print with supports on the build plate only and no supports for bridges.

Made with the personal version of Autodesk Fusion 360 therefore non commercial only.

Source file included.
