Modern BMWs (since F generation, I assume) has special rectangular shaped receiver on jack points like the picture which typical jack stand does not fit properly.

This is a jack stand adapter that fits those receivers. Plus, I designed a swing-head that allows  $\pm 10$  degrees angle in order to follow when the car is tilted such as lifted up only front or rear.

This adapter is designed for HEYNER® UltraSafe PRO Premium Jack Stand 2 tons. <https://h-premium.de/en/products/tools-service-garage/garage-accessories/674/premium-jack-stand-2-tons-2-pcs.-set> The adapter simply fits on it and use a zip tie to keep it in the position.

It may be usable with stands from other brand but not tested. Slight size adjustment may be achieved by scaling by a slicer.

I printed it in PETG with 100% infill, and tested myself but please pay maximum attention for your safety and be aware of any risk.
