I wanted to put extra pacifiers in my son's bed in an easy-to-find location in case he wakes looking for a pacifier.

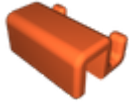

I printed it on the side with supports between the two hangers, with 15% infill but 100% infill on the connections (open the 3mf file in PrusaSlicer to see).

The fusion 360 source files are provided and are fully parametric, for example you can specify the bedhead depth and the width of the pacifiers.
