updated 13. 3. 2022 | published 12. 2. 2022

Summary

This front rack is designed for RadMini e-bike, but the four-bolt system is compatible with other bike models, too.

Rad Power Bikes front rack is usually out of stock, so I made this wee substitute for it.

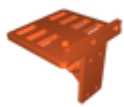

The rack transports a twelve-pack of one's favorite beverages or an equivalent amount of whatnot. It also has a built-in slot as an extra feature to carry a Kryptonite STD lock if needed (it should also work with other U-locks with approx. same dimensions).

This bad li'l boy attaches with four pcs of M6-bolts/screws.

Enjoy!

Update 13.3.2022: I also made a mount for GoPro-camera that can be attached to the rack. The print-ready file is added.
