Zosilnené telo a viacej unášacích zubov. Závit M10 ide ľahko. Pod vnútornú skrutku som dal ešte podložku, aby bola väčšia dosadacia plocha.

Tlačil som PLA ale v suboroch som pridal aj PETG.

Výška vrstvy 0,2 mm

Ak sa ti model páči klikni na srdiečko a ohodnoť hviezdami. Ďakujem.

Reinforced body and more driving teeth. The M10 thread is easy. I also put a washer under the inner screw to make it a larger seating area. I pushed PLA but I also added PETG in the files. Layer height 0.2 mm.

If you like the model, click on the heart and rate it. Well thank you.
