Replacement trigger for PoulonPro PR25 weed whacker.

Probably stronger than the original.

If you don't push the safety in first it's easy to put too much pressure on the main trigger. Or if you lay it down on something. Plus the only replacement parts I was able to find online were the wrong piece. So I made one.

Print Settings

Printer Brand:

Dremel Digilab

Printer:

3D20

Rafts:

No
