Original model scaled to 65% to fit my 15" 2016 MacBook Pro with Touchbar. Laptop fits with my case either way up but more snugly if you put the fat end down. Models also include some rubbery feet I printed in Ninjaflex (seen in grey in photo).

I didn't use supports when I printed but I think many printers will require it unless you have a powerful parts fan.

I've since moved on to a Dell XPS 15 and it fits that laptop nicely too
