This is a small organizer that I designed to hold the accessories that come with the electric skateboards from Boosted. it can be attached to the wall either using screws/nails (the holes are 6mm in diameter), or 3M Command strips, depending on which version you choose.

This organizer holds (left to right):

- The board charging brick
- The board end of the board charging cable (2 slots)
- The remote charging cable (1 slot)
- The remote (by the lanyard)

Variations:

- Large: these files have 90 degree openings in the slots that hold the cables. This one worked for me, but was a bit loose. YMMV.
- Small: these files have 80 degree openings in the slots that hold the cables. I haven't tested this one yet, but it should help if the large files don't hold the cables well enough.

- Holes: these files include 6mm diameter holes so that you can attach the organizer to the wall with nails or screws. **Files not labeled with "Holes" are meant to be used with 3M Command strips. I use the Velcro-style ones, but any kind will work.**

Print instructions Category: Organization Print Settings

Printer Brand: Monoprice

Printer: Maker Select

Rafts: Doesn't Matter

Supports: Yes

Resolution: 0.2mm

Infill: high
